

Integrating Application Pools with VMware Cloud POD Architecture

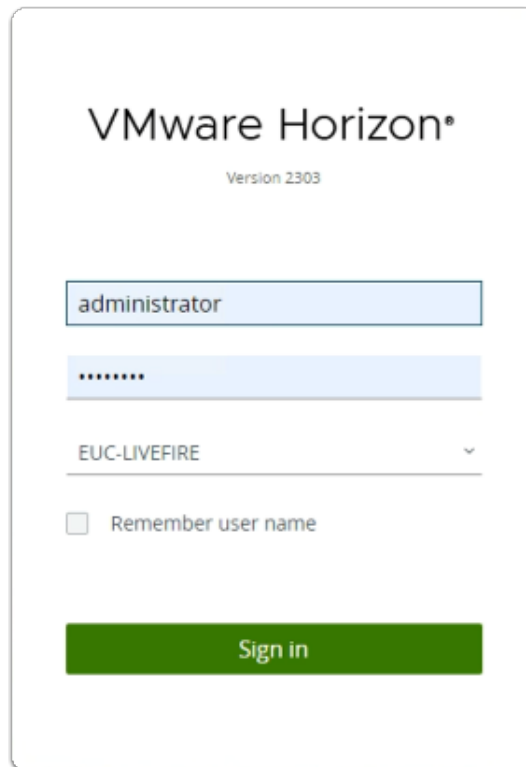

We will enable VMware Cloud Pod Architecture Published Applications and Integrate it with Workspace ONE Access

Part 1. Configuring Global Entitlements for the Multi-session Assignments

In a multi-site setup, USABILITY of Enterprise applications can be critical. Users require a seamless user experience. As part of Cloud Pod Architecture we are able to setup Global Entitlements that give administrators the ability, to entitle users to Applications and Desktops in a multi-site scenario. This makes the application more USABLE in an Enterprise.

We will fulfill the first steps in setting up a multi-site solution

Section 1. Configuring Global Entitlements for Published Applications on Site 1

VMware Horizon®
Version 2303

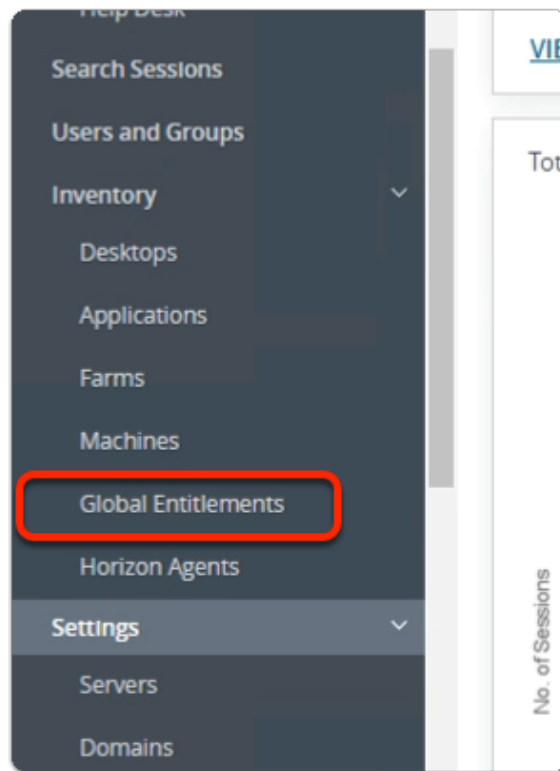

administrator

Sign in

1. On your ControlCenter Server
 - On your **Site 1 Browser**
 - From the **Favourites Bar**
 - Launch the **Horizon Site 1** shortcut
 - In the **Horizon Admin Console** login
 - In the **Username** area
 - enter **administrator**
 - In the **Password** area
 - enter **VMware1!**
 - select **Sign in**

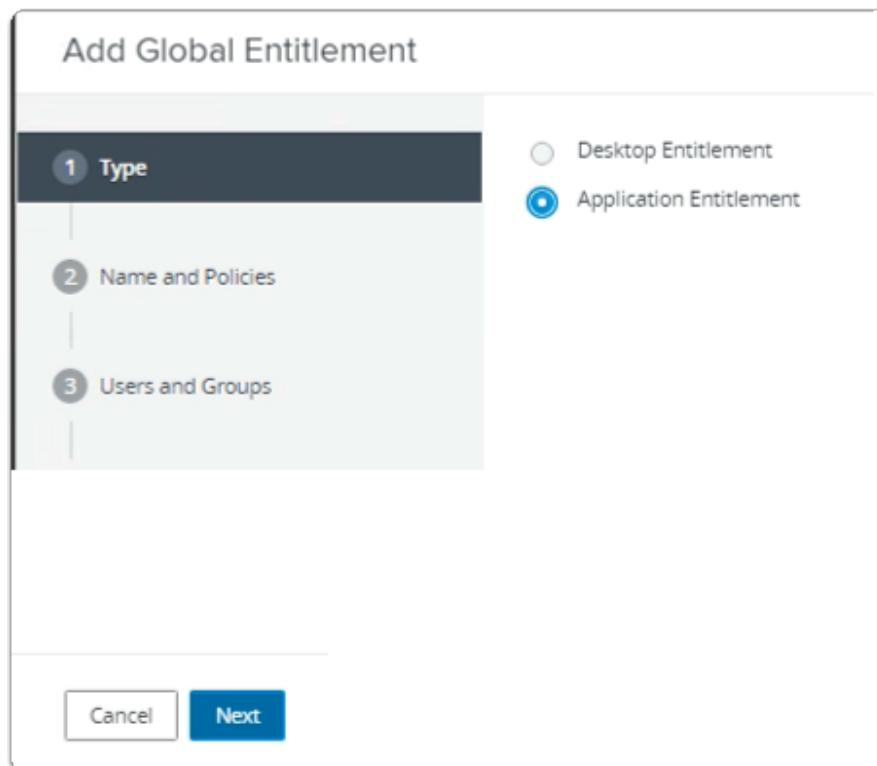

2. In the Horizon Admin console
 - **Menu** pane
 - below **Inventory**
 - select **Global Entitlements**

Step 1. Configuring a Global Entitlement for Calculator on Site 1

1. In the Global Entitlements area

- select **Add**

2. In the **Add Global Entitlement** window
 - next to :
 1. **Type**
 - Next to **Application entitlement** a
 - select the **radio button**
 - In the bottom right-corner
 - select **Next**

The screenshot shows the 'Add Global Entitlement' window. On the left, a vertical progress bar has four steps: 1. Type (completed with a green checkmark), 2. Name and Policies (highlighted in dark blue), 3. Users and Groups, and 4. Ready to Complete. On the right, the 'General' tab is active. It contains a red note: 'Asterisk (*) denotes required field'. Below this, there are four input fields: 'Name' (with an asterisk) containing 'Enterprise Corp Calculator', 'Display Name' containing 'Calculator', 'Federation Access Group' (with an information icon) containing '/', and 'Description' (empty).

3. In the **Add Global Entitlement** window
 - next to :
 2. **Name and Policies**
 - under **Name**
 - enter **Enterprise Corp Calculator**
 - under **Display Name**
 - enter **Calculator**

4. In the **Add Global Entitlement** window

- next to :

2. **Name and Policies**

- under **Default Display Protocol**
 - from the **dropdown**
 - select **VMware Blast**
- below **Allow Users to Choose Protocol**
 - from the **dropdown**
 - select **NO**
- next to **Pre - Launch**
 - select the **Checkbox**
- In the bottom right-corner
 - select **Next**

 - select the **checkbox**
- select **Add**

15. In the **VMware Horizon Admin** console
 - Note your **Global Entitlement** now has a local assignment
 - called **Terminal**

Part 2. Integrating Multi-session apps with Workspace ONE Access

- We will create Deep Links that will point to the Published Multi session Applications
- Each Web App link will then be assigned to the relevant security groups

Step 1. Deploying a Deep link for the Enterprise Corp Calculator Global Entitlement

The image shows a login form for Workspace ONE. At the top is the Workspace ONE logo, which consists of a hexagon made of six colored triangles (green, blue, orange, red, yellow, and purple) arranged in a circular pattern. Below the logo is the text "Workspace ONE". The form has three input fields: "Username" with the text "administrator", "Password" with masked characters "*****", and "System Domain". Below these fields is a blue "Sign in" button. At the bottom of the form are two links: "Forgot Password?" and "Change to a different domain".

1. On your ControlCenter server
 - Open your **Workspace ONE Access**, Admin console URL
 - Under **Username**
 - enter **Administrator**
 - Under **Password**
 - enter **VMware1!**
 - Select **Sign In**

2. In the **Workspace ONE Access Console**

- select **Resources**
- Under **the Resources > WEB Apps** area
 - select **NEW**

The screenshot shows the 'New SaaS Application' window. The 'Definition' tab is selected. The 'Name' field is filled with 'Enterprise Corp Calculator'. The 'Icon' field has a 'SELECT FILE...' button highlighted with a red box. The 'Description' field is empty.

3. In the **New SaaS Application** window

1. **In the Definition** area

- under **Name**
 - enter **Enterprise Corp Calculator**
- under **Icon**

- select **SELECT FILE ...**

4. In the **File Explorer > Open** window
 - In the **Quick Access** pane
 - select **Desktop**
 - in the **Desktop** area
 - select **software > software > Icons**
 - in the **Icons** folder
 - select **calculator.png**
 - select **Open**

- **Web Apps** interface
 - Note your **Enterprise Corp Calculator** Web Application Link

Step 2. Deploying a Deep link for the Enterprise Corp Sudoku Global Entitlement

1. In the **Workspace ONE Access Console**
 - under **the Resources > WEB Apps** area
 - select **NEW**

The screenshot shows a web interface titled "New SaaS Application". On the left is a sidebar with four tabs: "1 Definition" (selected), "2 Configuration", "3 Access Policies", and "4 Summary". The main area is titled "Definition" and contains the following fields:

- Search** (with a magnifying glass icon)
- OR BROWSE FROM CATALOG** (a blue link)
- Name** (with a red asterisk and help icon): The text "Enterprise Sudoku" is entered.
- Description** (with a help icon): An empty text area.
- Icon** (with a help icon): Below this label is a button labeled "SELECT FILE..." which is highlighted with a red rectangular border.

2. In the **New SaaS Application** window

1. **In the Definition** area

- under **Name**
 - enter **Enterprise Sudoku**
- under **Icon**
 - select **SELECT FILE ...**

3. In the **File Explorer > Open** window
 - In the **Quick Access** pane
 - select **Desktop**
 - in the **Desktop** area
 - select **software > software > Icons**
 - in the **Icons** folder
 - select **sudoku.jpg**
 - select **Open**
